TECHNICAL SKILLS

Languages: C/C++, Python, SQL, JavaScript, HTML/CSS.

Web Technologies / Frameworks: Next.js, React.js, Node.js, Tailwind CSS, Django, MySQL

Coursework: DSA, OOPs, MERN Stack Development, Low-Level System Design.

Developer Tools: Git, GitHub, Netlify, Firebase, VS Code, Canva, Clerk.

EXPERIENCE

Upgrad School of Technology

Pune, India

Software Development Engineer

Jul. 2026 – Present

- Developed core backend services for the exam platform using **Python**, scaling features to support **2000+** students.
- Developed a pre-exam laptop compatibility check to prevent technical issues, increasing student **participation by 10%** and **reducing support tickets by 5%**.

Newton School of Technology

Delhi NCR, India

Software Development Engineer

Jul. 2025 – Jun. 2026

- Engineered an automated interview management system with slot booking and in-product feedback, streamlining manual workflows and **saving Rs. 7.2M/year in operational costs**.
- Built authentication and authorization APIs for the Rishiverse platform using **Django Framework, and MySQL**.
- Built a real-time voice-interview platform and an AI-based coding tutor to support core platform features, successfully facilitating **10,000+ user sessions**.

Software Development Engineer - Intern

Jan. 2025 – Jun. 2025

- Engineered a student management portal using **React**, streamlining administrative workflows for **2000+** users.
- Developed a memo app to reduce Slack dependency and targeting a **40% increase** in engagement.

GeeksForGeeks

Noida, India (Remote)

Member of Technical Staff - Intern

Dec. 2024 – May 2025

- Created **150+** coding problems across three difficulty levels, each with at least six comprehensive test cases.
- Revamped **250+** DSA-based articles, providing solutions from naive to optimal in five programming languages.

PROJECTS

Genius.AI – SaaS Platform | React, Tailwind CSS, Stripe, Clerk, MySQL

[Github](#) | [Video](#)

- Built a SaaS (Software as a Service) platform featuring five AI tools that **generate images, videos, music, code** and facilitate **general conversation**.
- Integrated **Gemini API** for code generation & conversation and **3 Replicate Models** to create diverse media.
- Implemented **Stripe** for payment processing and **Clerk** for user authentication, with capacity to manage information of 1000+ users in **MySQL database** set up through **Prisma ORM**.

YouTube Analyzer – Chrome Extension | Python, Flask, Transformers, JavaScript

[Github](#) | [Video](#)

- Developed a Chrome Extension that can **analyze and summarize** the long YouTube Video within 20 seconds.
- Leveraged the **Transformer's mT5 Multilingual XLSum Model** to analyze YouTube video using the Transcript.
- Enabled **Gemini API** to resolve users' queries related to YouTube Video using summarized text.

EDUCATION

BTech, Computer Science & Engineering

CGPA: 8.70

AKS University, Satna, MP

Sep. 2021 – May 2025

ACHIEVEMENTS

- Won National Level Hackathon**, SprintHacks 2k23, organized by GDSC KIET, Ghaziabad. [Link](#)
- CodeForces: **Maximum Rating – 1696** | **Expert** | India Rank 863 | Global Rank 9330. [CodeForces Profile](#)
- CodeChef: **Maximum Rating – 2019** | **5 Star** | India Rank 1100 | Global Rank 9000. [CodeChef Profile](#)
- LeetCode: **Maximum Rating – 2112** | **Knight** | Top 1.53% | Global Rank 9500. [LeetCode Profile](#)
- Achieved **Global Rank 29, 57, 71** in CodeChef Starters 150, 130, 143 (Div. 2) respectively.
- Secured **Global Rank 456 & 469** in CodeForces Round 951 (Div. 2) & 962 (Div. 3) respectively.
- Clinched **India Rank 76, 154, 173** & Global Rank 489, 629, 674, in LeetCode Biweekly 128, 130, 140 respectively.
- Solved over **2000 DSA/CP Problems** across platforms such as GFG, LeetCode, CodeChef. linktr.ee/avi0308
